

**FUJIFILM launches Year Album service in Singapore**

**Singapore, 31 August 2015** - FUJIFILM Asia Pacific Pte. Ltd. is pleased to announce the launch of Year Album service that enables consumers to make a photo album easily using Image Organizer technology.

The main feature offered by Year Album is an automatic preview from a massive amount of images by Image Organizer software with 3 Smart functions - “*Smart Select*” function which recommends suitable images from still images automatically, “*Smart Layout*” function which provides suitable image layout corresponding to each photo product and “*Smart Casting*” function which sorts the images of main and important characters determined by consumers.

Fujifilm’s proprietary Image Organizer technology helps to select, layout and cast key people automatically by analyzing every single image in only 5 minutes\*, just by inputting three conditions - storage location, time period and page volume of album.

The Year Album editing software enables consumers to select the main and important characters. The key people to appear on the Year Album can be changed simply by clicking on the candidate. Other features include adding and deleting of images, editing and decorating the proposed page layout, choosing of cover colours, adding of album titles, stamps and comments.

Year Album is made with Fujifilm’s high-quality yet traditional silver halide premium paper and lay-flat binding with hard cover to ensure optimal storage conditions.
